Test Values are minimum specifications.*

For all pleasure craft, power or sail, Regatta® Marine Fabrics with Rain Kleen® finish provide the best answer for marine fabric accessories such as lace-on fly bridge tops, enclosure borders and curtains, awnings, bimini tops, sun covers, navy and convertible tops, mooring and protective covers of all types.

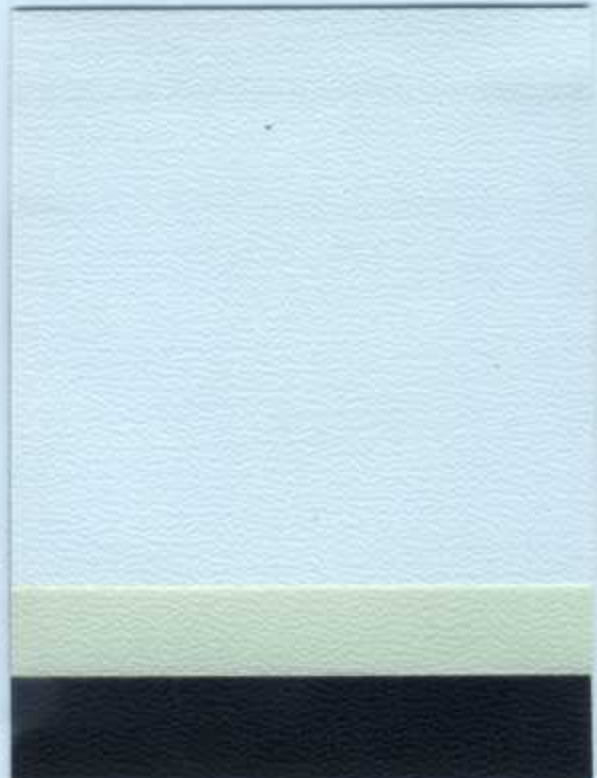

Regatta® Marine Fabrics are designed specifically for the rigorous top side UV exposure and the weather challenges of the open marine environment.

This performance composite fabric is formulated with high quality vinyl with an inner reinforcing core fabric woven from high tenacity yarns.

The exclusive Rain Kleen® finish on the weather side provides ease of cleaning, prolongs the life of the fabric and adds to the pleasing appearance of the surface.

Regatta's extreme strength and multidirectional stretch resistance, including bias, affords superior contouring and lasting trim fit.
